

Esraa Al-Droubi

Flutter & AI Engineer

Hi, I'm Esraa

Specialized in building high-performance applications with **Flutter** Possess extensive experience in web applications using **React** and integrating advanced **Artificial Intelligence** chatbots and models.

Highlights of My Professional Path

Credly Certification

Successfully completed the Androw Ang and Artificial Intelligence track, earning an official verified badge on Credly.

Self Care Graduation Project

Designed and developed a fully integrated self-care platform using React and With the help of my colleagues they created the backend with Node.js featuring an interactive smart AI chatbot UI.

Academic Progression

Completed BAIT degree from SVU (March 2026) and transitioned smoothly into pursuing a Master's in Web Science and Artificial Intelligence.

 ABOUT ME

Bridging Flutter Development & AI Chatbots

Background

Experience

Vision & AI

I am a proud graduate of the Syrian Virtual University (SVU) with a Bachelor's degree in Business Administration and Information Technology (BAIT), completed in March 2026. Currently, I am expanding my expertise by pursuing a Master's degree in Web Science and Artificial Intelligence.

Deep Learning with PyTorch : Generative Adversarial Network

Coursera(Training AI)

Fake News Detection with Machine Learning

Coursera(Training AI)

Facial Expression Recognition with PyTorch

Tweet Emotion Recognition with TensorFlow

Coursera(Training AI)

Professional Experience & Methodologies

Current Internship

AI Engineering Trainee

Coder Company(Tamkeen)

Training on advanced artificial intelligence models, data processing workflows, and exploring integration architectures between modern applications and AI systems.

Full-Stack & Mobile

Full-Stack & Flutter Developer

Freelance & Graduation Projects

Developed complete mobile solutions using Flutter, and I have Experience web Developed using react , featuring interactive UI/UX and integrated AI chatbots.

Work Methodologies & Architecture Standards

Clean Architecture

Isolating business logic from UI and data layers for highly maintainable code.

BLoC & Provider Pattern

Predictable state management for complex, high-performance applications.

Agile / Scrum Methodology

Collaborative workflow, sprinting, task management, and iterative delivery.

RESTful APIs Integration

Seamless backend communication, secure endpoints, and JSON parsing.

AI Chatbot & Application Integration Vision

My vision for a personal AI chatbot that integrates with various applications and services. By leveraging AI, I aim to create a seamless user experience that simplifies daily tasks and enhances productivity.

Personal AI Chatbot Integration

Integrating AI chatbots into various applications and services to provide a unified user experience.

combining **React & Flutter** with **TensorFlow, PyTorch and Advanced Chatbots**, I design applications that interact naturally and provide personalized user experiences instantly.

Founder of an educational tech community helping IT students across the Arab world.

Alongside development, I founded and run an educational tech community across WhatsApp and social media for Information Technology students. What started as a small group has grown into a space where thousands of students get help, share resources, and follow AI and tech news — and I've personally helped over 2,000 students along the way
